DETAILED ACTION

Election/Restrictions

1. Applicant's election of group Ia, claims 1-2 in Paper No. 7 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 112

2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "750" in line 3, should be -- 75 degrees --. Correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Art Unit: 1725

4. Claim 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kajiwara et al (US 5,234,154) and rejected under 35 U.S.C 102 (e) as being anticipated by Funamoto et al (US 6,213,381).

Both Kajiwara et al and Funamoto et al disclose the method of bonding metal plates comprising the steps of applying a shearing blade of specific shape one onto both sides of overlapping metal plates. Forming a bonded portion by making use of the deformation of each sheared surface during the shearing process, wherein the bonded portion or bonded surface is formed in an oblique direction inclined, less than 75 degrees, with respect to the thickness direction of the metal plate as shown in the figures of Kajiwara et al and Funamoto et al (col. 21, lines 20-36).
